More information

Requirements to Papers and Posters

Presentations will be selected from abstracts, which should be 2 pages maximum as a condensed version of the paper or poster. The Programme Committee reserves the right to group papers, which cover similar topics and to integrate some of the submitted contributions into Poster-Sessions. Further information and the formal requirements on full papers will be provided with the notification of acceptance.

Dates

Only those contributions which meet the following dates may be considered:

Application and abstracts for papers/posters: 04.03.2022

Authors notified of acceptance: 29.04.2022

Full paper until: 04.11.2022

Executive Committee

C. Hörnke-Dobrick, Organization, TÜV NORD Akademie

J. Feinhals

S. Müller, T. Pöhlens, D. Beltz, TÜV NORD EnSys

Programme Committee

V. Ljubenov, IAEA (Head of Programme Committee)

H. Efraimsson, Swedish Radiation Safety Authority, Sweden

G. Kraus, Hessian Ministry of the Environment, Climate Protection, Agriculture and Consumer Protection, Germany

R. Stroude, Federal Office of Public Health FOPH, Suisse

M. de Toro, Consejo de Seguridad Nuclear, Spain

H. Ogino, Nuclear Regulation Authority of Japan

12th International Symposium Release of Radioactive Materials Provisions for Clearance and Exemption

Scope of the Symposium

Since 1998 TÜV NORD organizes various symposia dedicated to the "Release of Radioactive Material from Regulatory Control". During the previous international symposium in Berlin in 2017 more than 130 clearance experts were welcomed to contribute to the discussions of this issue, which due to huge decommissioning projects moves in the focus of public interest. These interchanges of experience help to optimize release procedures and to reduce the amount of radioactive waste. In November 2022, we would like to continue the fruitful exchange of experience.

From the very beginning in 1998, the symposia have followed up the change of international regulation and guidelines in the area of clearance. Currently, the new IAEA Safety Guide DS500 on the "Application of the concept of clearance" is in the process of endorsement and will update and supersede the previous Safety Guide RS-G-1.7 "Application of the concept of Exclusion, Exemption and Clearance". Considering this highlighted starting point, we invite you, as interested experts from many countries, to continue the exchange of experience, expertise and information in the field of clearance. TÜV NORD will organize a symposium, which is intended to take place on **15th - 17th November 2022 in the Crowne Plaza Congress Hotel in Frankfurt**. We would be pleased to welcome you to the Get Together on the evening of the 14th November 2022.

General Symposium Arrangements

The symposium will consist of oral and poster presentations selected from submitted abstracts by the Programme Committee. All oral presentations are planned to be given in plenary sessions. Each presentation is intended to be 20 minutes plus 10 minutes for discussion. Poster presentations are also planned as an equal part of the symposium programme.

It is planned that proceedings will be available at the beginning of the symposium. If you are interested in submitting a paper and/or a poster, in attending this symposium, or in participating as an exhibitor, please provide details on the attached Reply Form.

In addition to the symposium programme a technical exhibition will take place in the lobby. The symposium is directed towards scientists, engineers, technicians and lecturers in the field of radiation protection or whose tasks require knowledge in this area. It will be of interest not only to radiation protection and nuclear safety representatives in companies and other organizations, and health and safety specialists, but also to public authorities, independent experts and inspectors, applicants for planning permissions in the field of atomic energy and others with related site responsibilities.

Programme Concept

Overview of National/International Legislation
Clearance and Release Implemented
Clearance Strategies
Radiological Characterization in Clearance and Exemption
NORM
Remediation of Sites

At present, we are glad to already announce the following presentations outlining the international perspective on the application of the concept of clearance.

The New International Guidance on Clearance – IAEA Perspective
V. Ljubenov, IAEA

Conditional Clearance in Switzerland – Theory versus Practice
R. Stroude, Federal Office of Public Health FOPH, Switzerland

The Current Status of Clearance Issues in Sweden
H. Efraimsson, Swedish Radiation Safety Authority, Sweden

International Perspectives on Clearance and Characterization for
Clearance of Materials
A. Larsson, Cyclife Sweden AB, Sweden

Overview of regulation and practices for exemption and clearance
in Japan
H. Ogino, Nuclear Regulation Authority of Japan

Fee

Attendance fee: 1.120,00 € plus VAT **1.332,80 € incl. VAT**
We also offer this event as a Live Stream.
Attendance Fee Live Stream:
920,00 € plus VAT **1.094,80 € incl. VAT**

The conference language is English. The fee will cover a copy of the proceedings, three lunches and three special evening events. Reductions are available for authors with accepted papers (970,00 € plus VAT) and representatives of authorities (720,00 € plus VAT, limited availability).
