# Towards a new Partnership on RWM

The 2023-2025 Work Programme included a *name-to-beneficiary* topic for a new Partnership on Radioactive Waste Management.

Ensuring a smooth transition from the Joint Programme EURAD to the Partnership EURAD-2 in 2024

Similar 3-college governance system as in EURAD. A first list of Work Packages is public. A second wave will follow.

A more pronounced role for the regulators and the waste generators /industrial stakeholders in a structured End User Group

# Interactions with civil society

# CSO and EAB

## CSO

- has/have no affiliation
- play/s a critical role for the credibility of the Partnership
- Three names, each proposed by a college
- Feedback from Piet: “Two CSO would be ideal”

## EAB

- Missed opportunity from EURAD
- We need to define the scope of their activities and their mission
- Representativity of the different end-users and colleges is important
